

Corporate Training Solutions

Building Enterprise Capability and
Operational Efficiency for the Digital Era

The Digital Mandate: Move Faster, Work Smarter

In the fast-changing, AI-driven digital era, organizations cannot rely on outdated, fragmented operational models. True growth requires a unified approach to digital product and service management that scales across the entire enterprise—enabling teams to turn strategy into outstanding, measurable results end to end.

The definitive framework
powering modern enterprise.

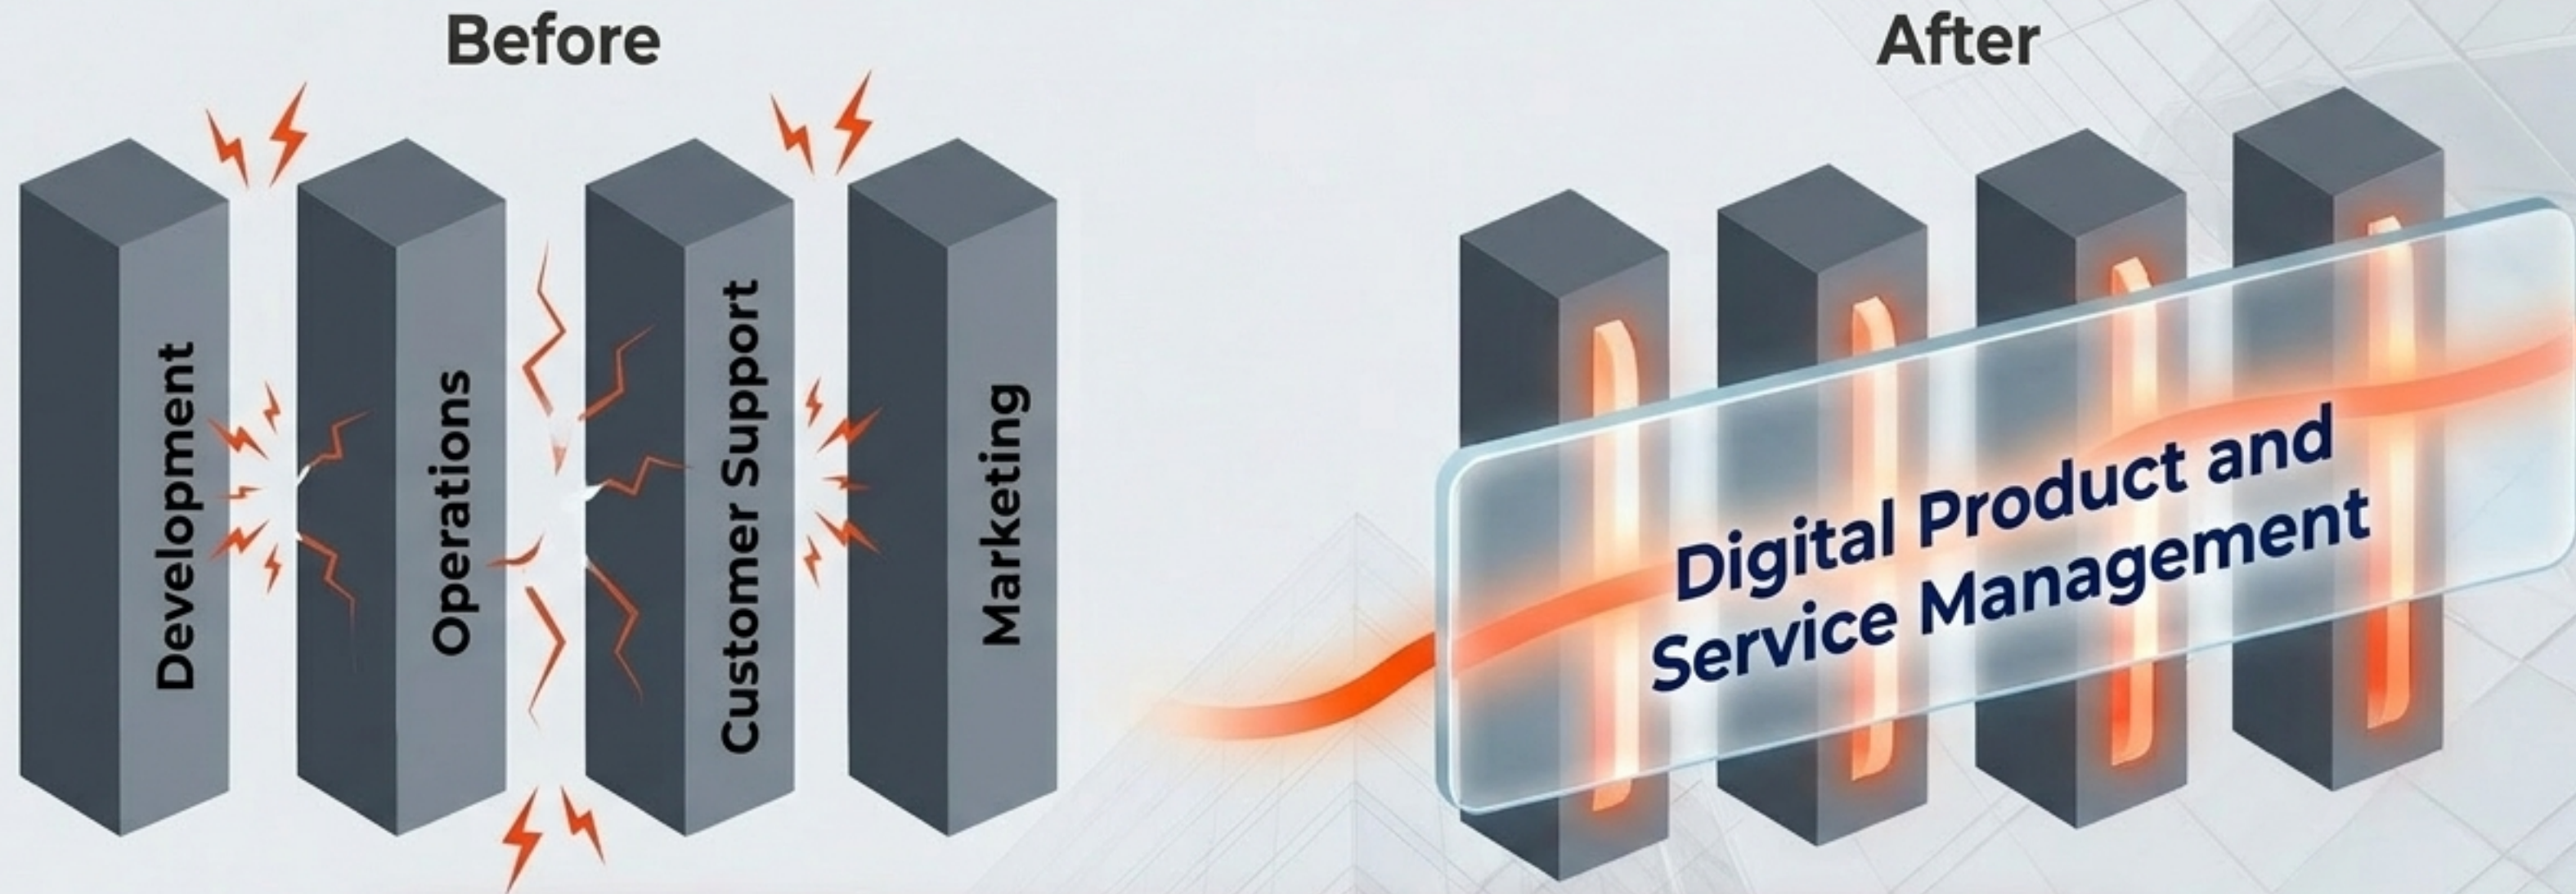

50,000+

Trusted organizations worldwide

82%

Of the Fortune 500 powered by ITIL

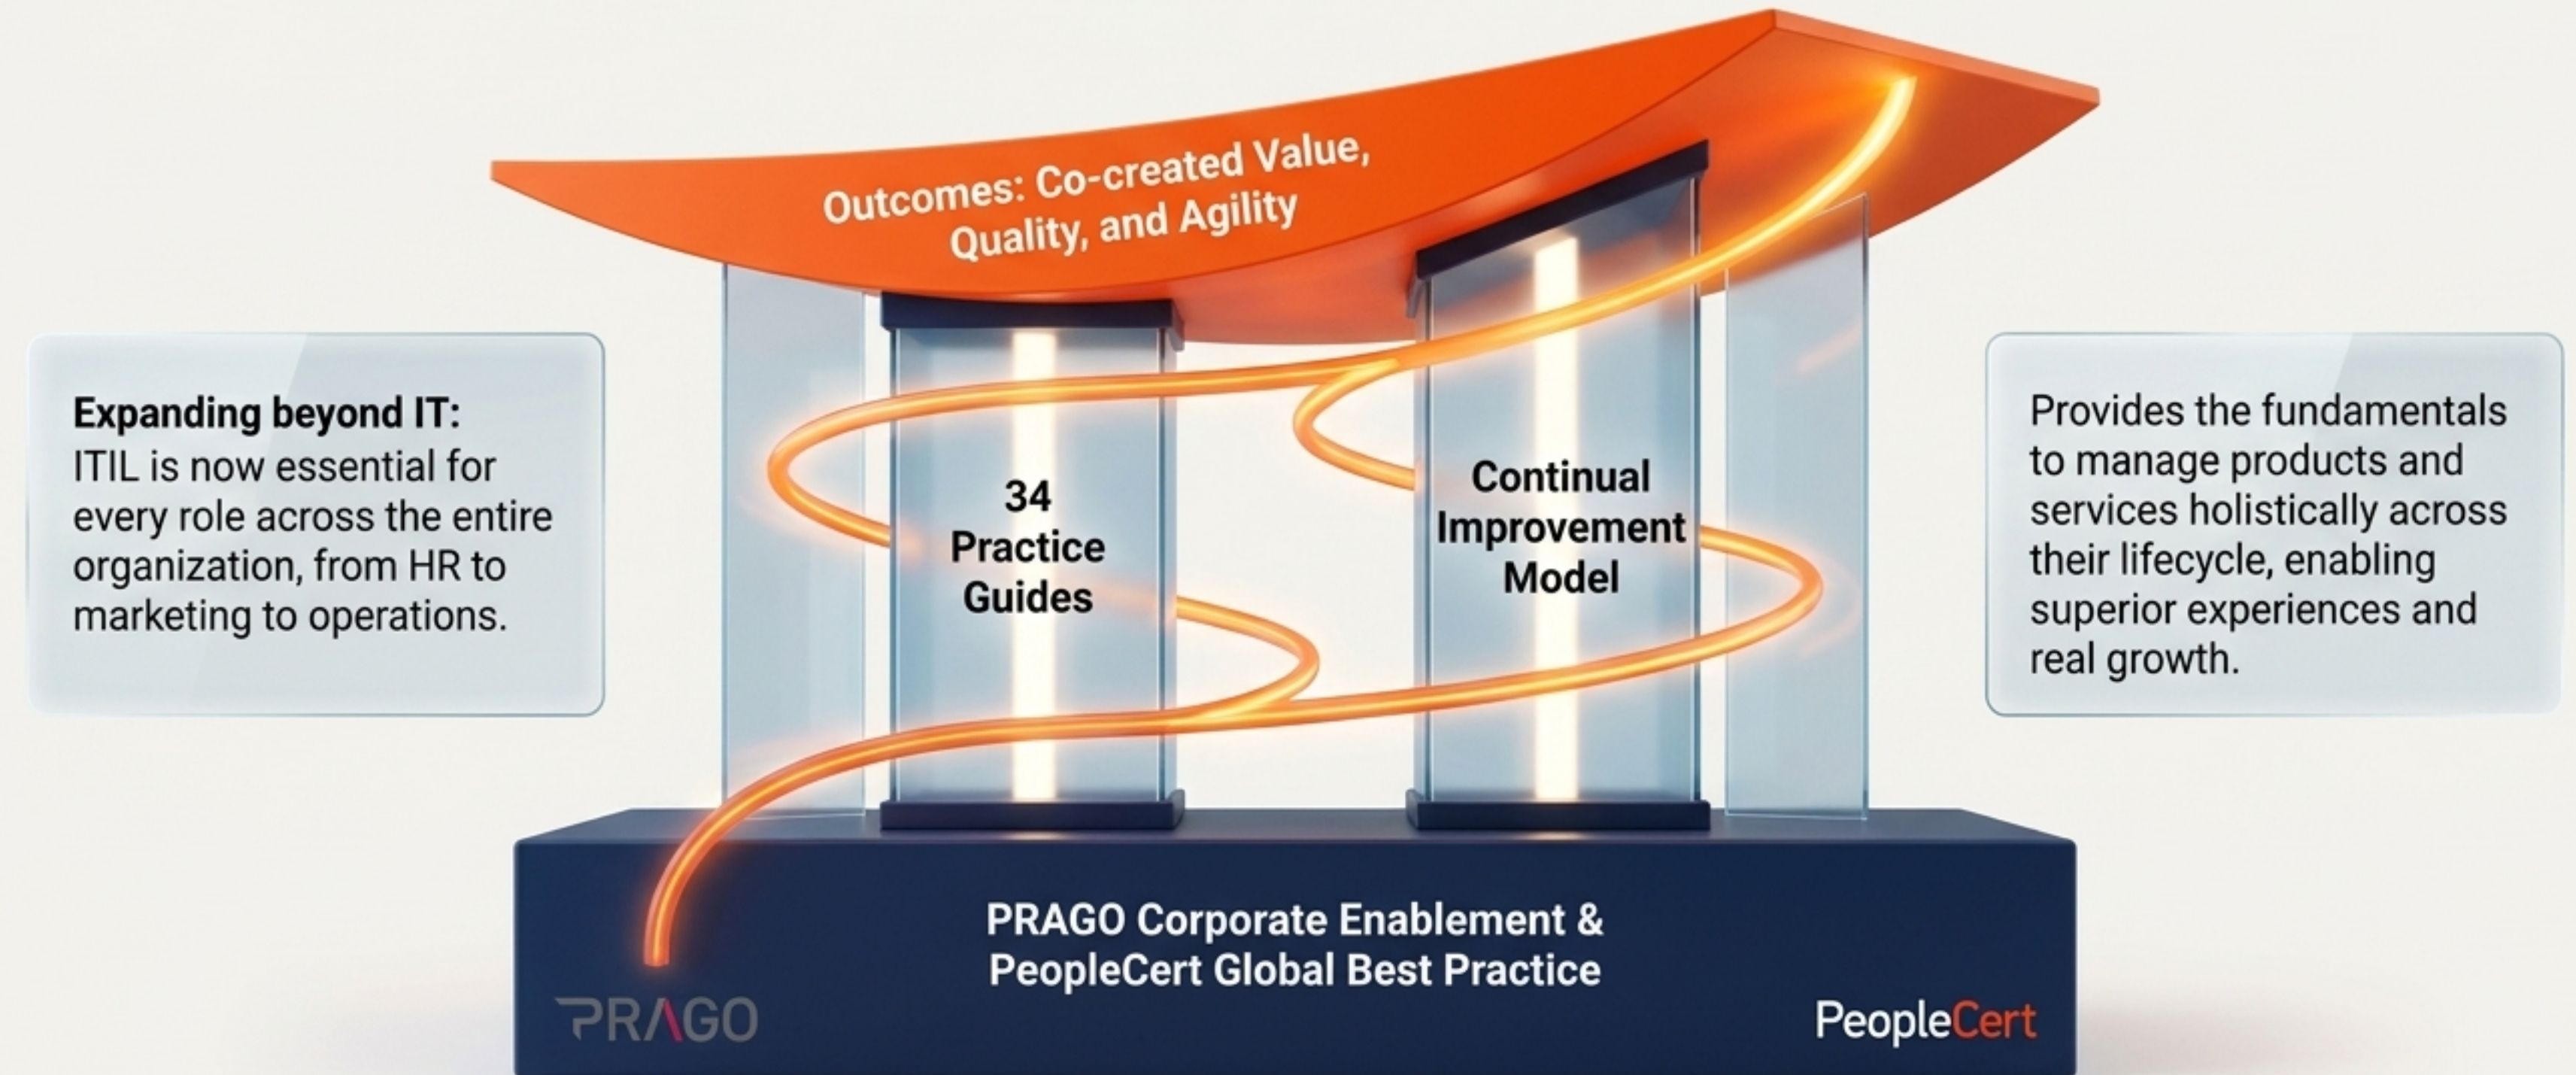

Breaking the Architecture of Isolation

Traditional training optimizes silos. PRAGO's ITIL-powered solutions establish clear value streams and ownership across teams, transforming isolated departments into a shared, human-centric ecosystem that delivers consistent value.

The Enterprise Operating System

PRAGO Corporate Training Powered by ITIL® 5

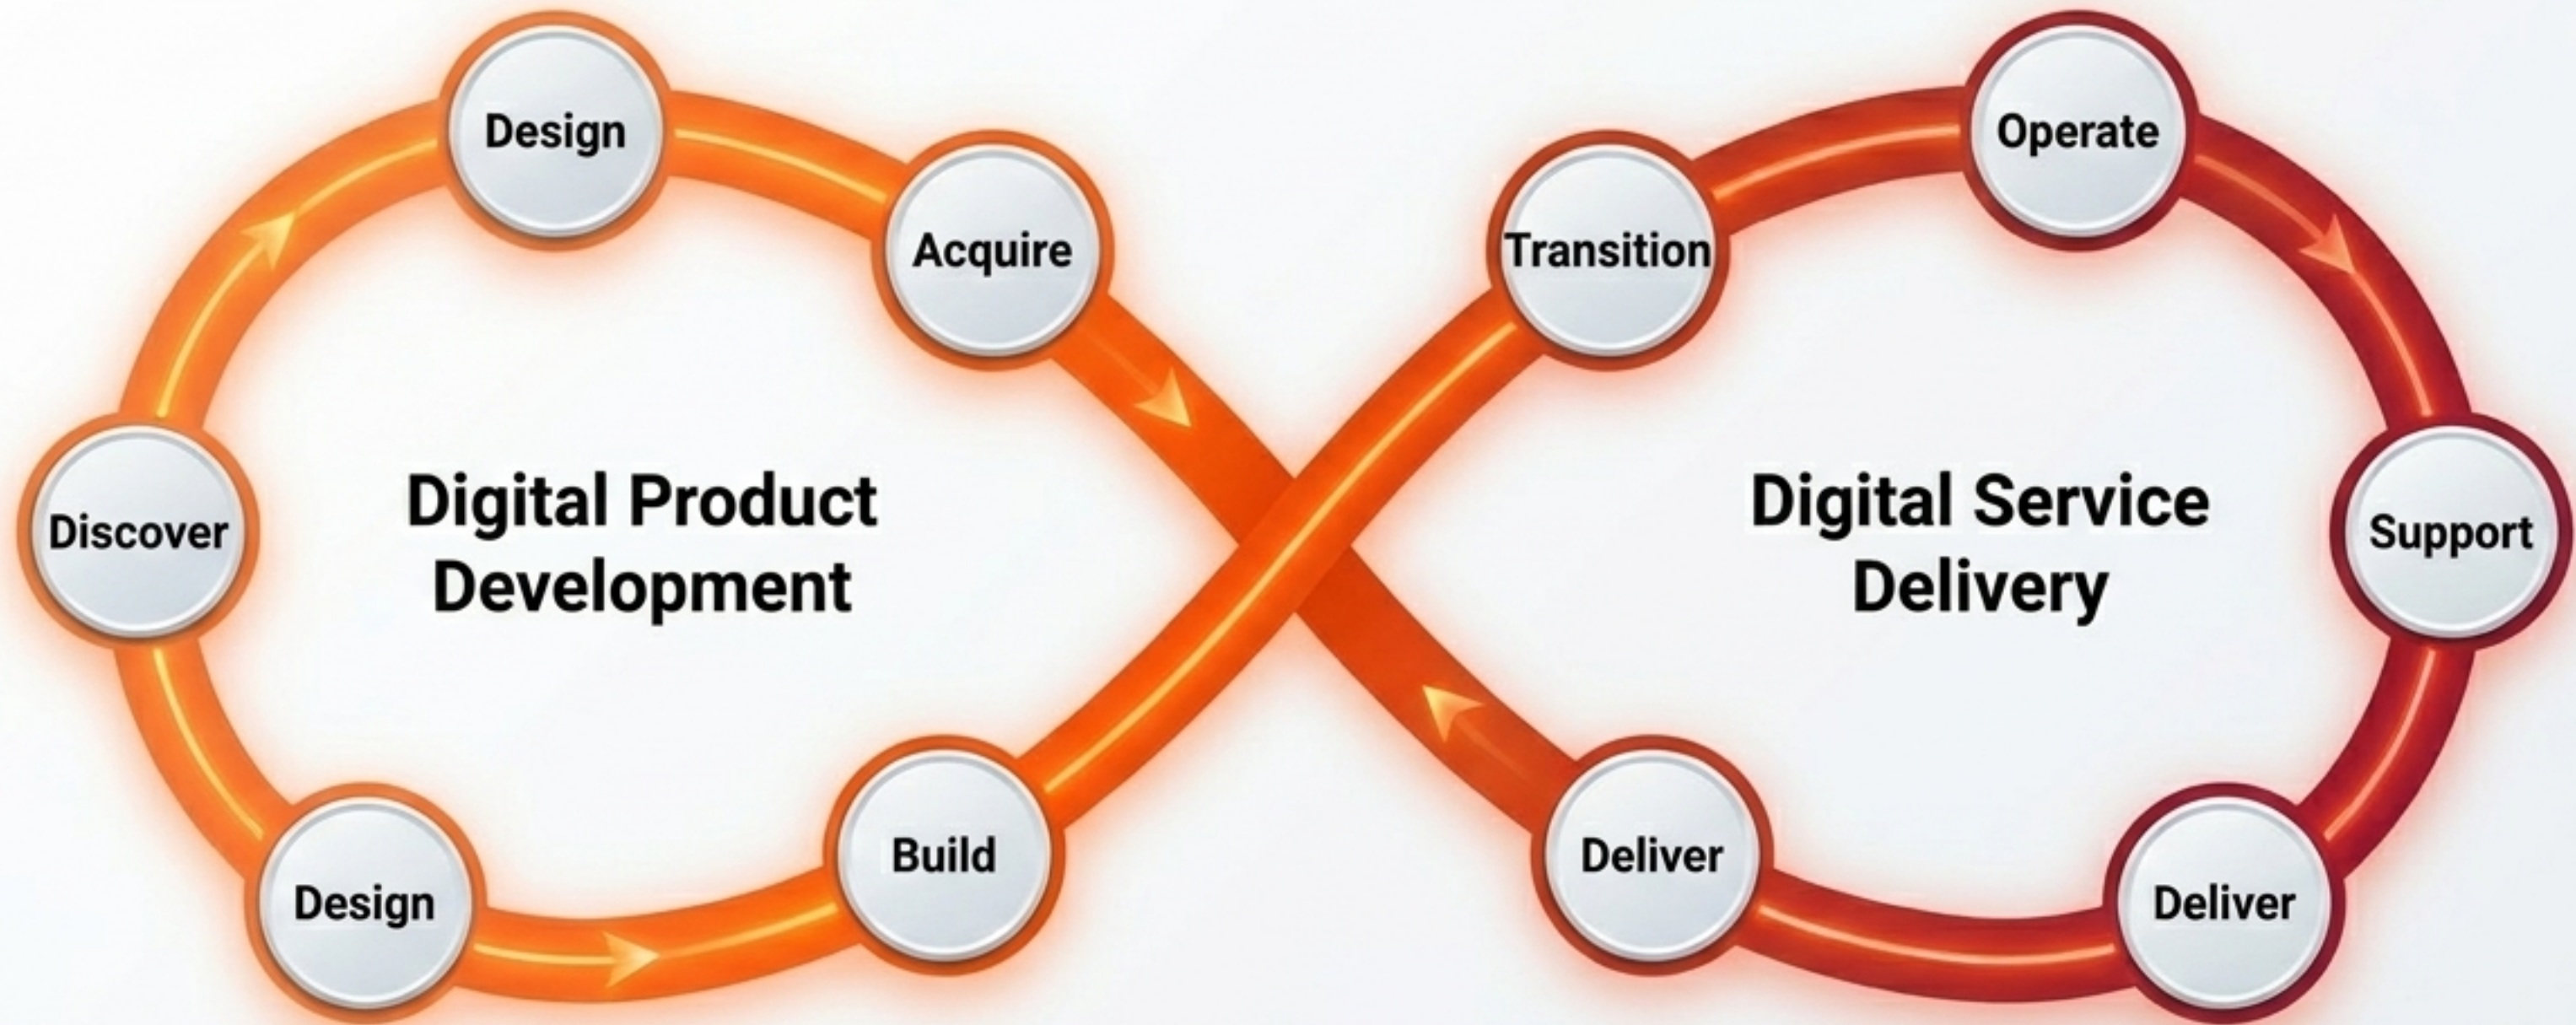

Holistic Capability: The Four Dimensions Matrix

PRAGO upskilling ensures teams design and operate services considering all four dimensions simultaneously, preventing costly blind spots and systemic failures.

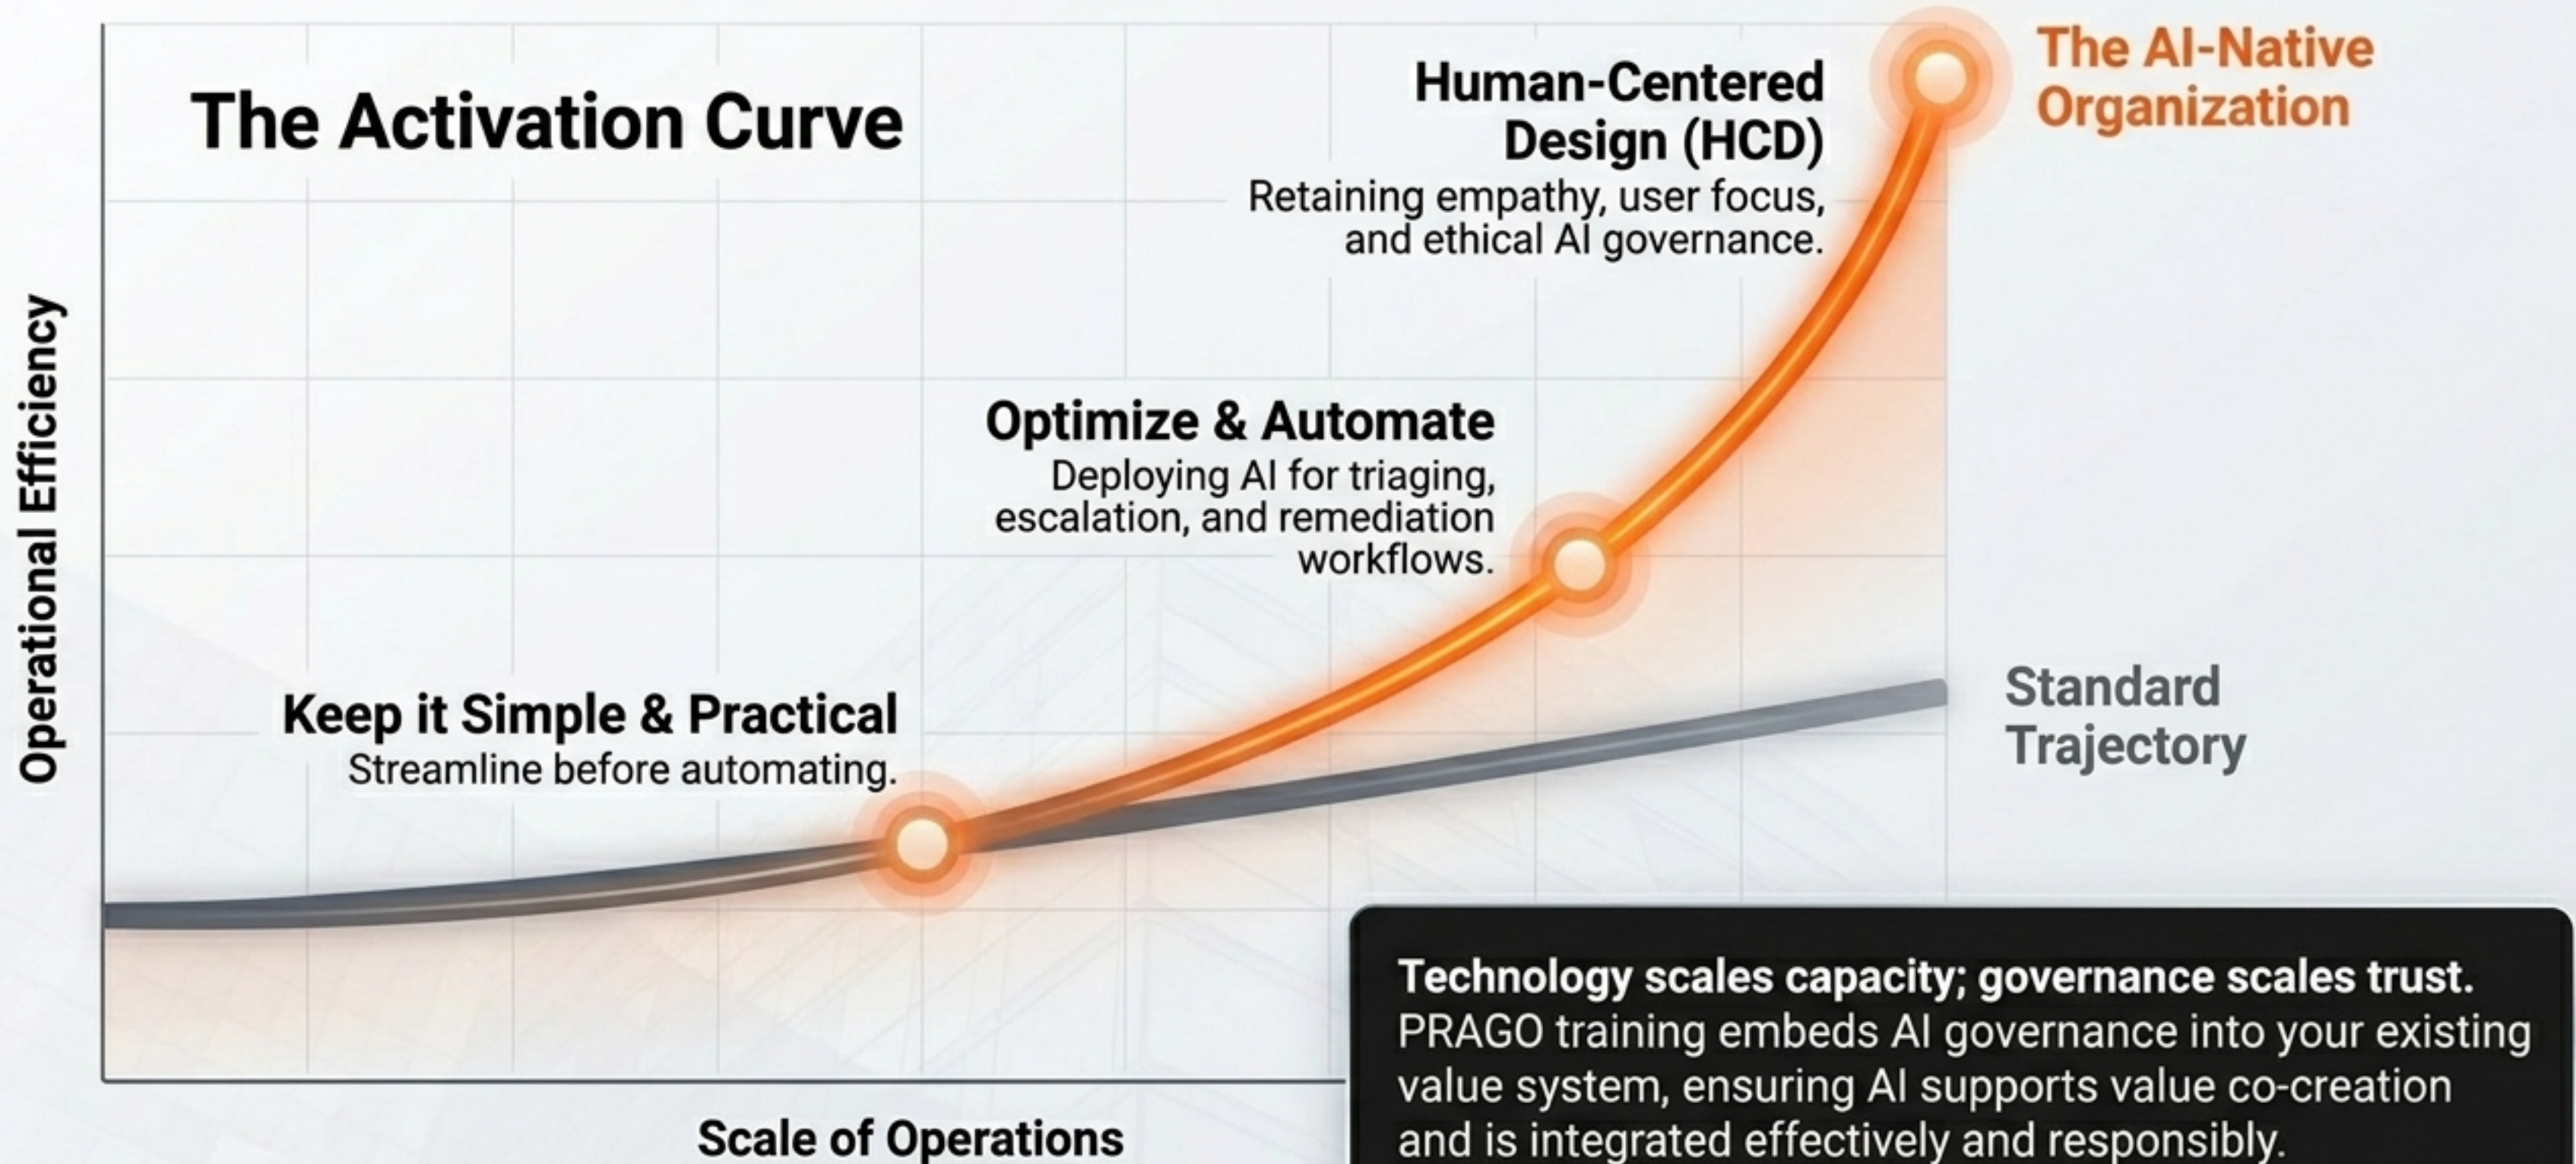

Mastering the End-to-End Lifecycle

User experience depends on two interconnected factors: the quality of digital products and the maturity of the management system.

Our training shifts team focus seamlessly between agile product development and highly reliable service delivery, ensuring value is consistently created for stakeholders.

AI-Native, Human-Centric Execution

The Synergy Matrix: Architecting Comprehensive Delivery

ITIL®

The Language of Growth

Focus: Governance, Strategy, and Digital Product/Service Management across the value chain. Ensures stability and alignment.

DEVOPS INSTITUTE®

The Language of Collaboration

Focus: Speed, rapid continuous delivery, automation, and agile operational practices.

PRINCE2®

The Language of Success

Focus: Control, structured project management, and delivering strategic change initiatives safely.

ITIL provides the structure, DevOps provides the speed, and PRINCE2 provides the control. PRAGO holistic training aligns strategy, change initiatives, and daily operations into a single cohesive motion.

Driving Measurable Operational Efficiency

Reliability

Consistent performance over time and cycles.

Site Reliability Engineering (SRE)

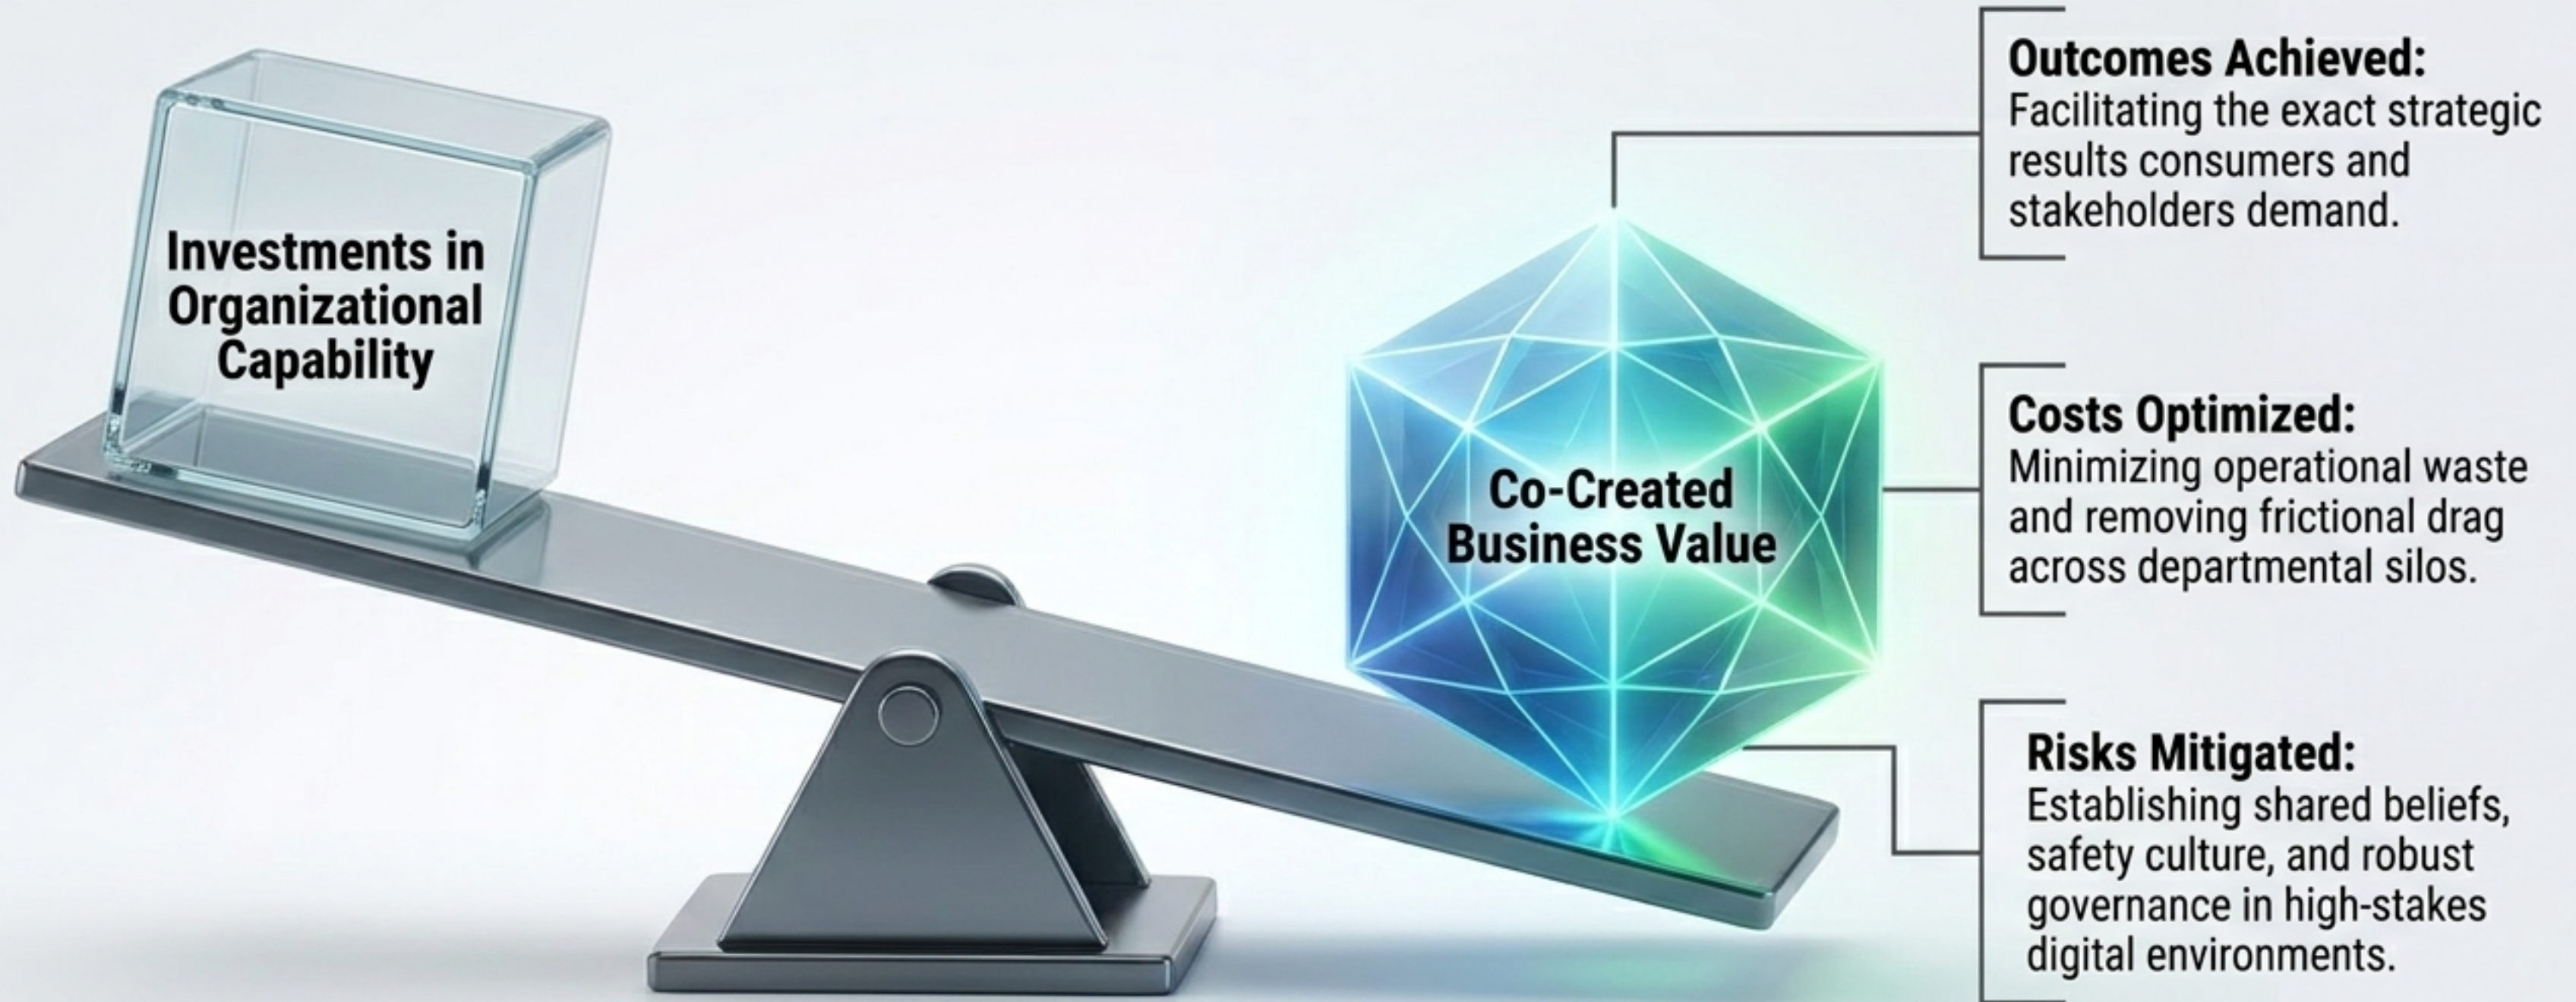

Applying software engineering to ops to scale highly reliable systems.

Observability

Understanding internal system states through metrics, logs, and traces to identify risks early.

Transform operations from a reactive cost-center to a proactive value-driver. Proper capability development ensures that when complex systems scale, performance and security scale with them.

The Business ROI of Workforce Upskilling

You don't buy training. You invest in the capability to continuously co-create value.
